# Product Sheet

# CTRL-Kora™ Remote Monitoring

Welcome to the future of wet stock monitoring with the CTRL-Kora.

Our innovative device revolutionizes how you monitor and manage fuel, oil, water, and more, ensuring efficiency, accuracy, and peace of mind.

**By clearly showing alarms in plain English with recommended actions linked to remote monitoring, site staff can quickly resolve issues and raise service calls immediately**

## Device Features

## Versatile Monitoring

CTRL-Kora connects to a range of automatic tank gauges (ATG) including Veeder Root, Frankin, Fafnir and ProGauge as well as Clarkson's own CTRL-Kora monitoring solution.

It is capable of monitoring various liquids, including fuel, oil, and water, offering comprehensive oversight of your wet stock for site staff, tanker delivery drivers and also remote monitoring of wet-stock via Clarkson's Coppertree cloud based dashboard.

## Simple clear custom display

Full color 7" touch screen display in solid stainless steel for desk mounting, allows clear visual display of alarms display in plain English

## Connectivity

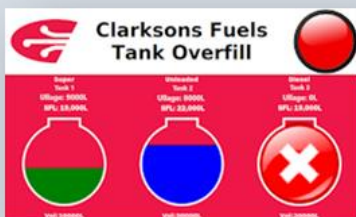

CTRL-Kora connects to a range of devices on a site via Ethernet, Wi-fi, Modbus and Serial connections to display alarm and tank data.

Data can be securely transmitted to Clarkson's Coppertree cloud dashboard ensuring confidentiality and reliability of data including estimated number of days of supply and flow rates.

The CTRL-Kora display can be left on 24/7 for display of not just wetstock data and alarms but also other common site devices such as temperature, water and power usage

## Alarms

Advanced alarm capabilities with the CTRL-Kora offers robust capabilities for handling alarms, along with remote logging, ensuring that critical alarm conditions are promptly identified and addressed by routing to the right people

## Monitoring

Access real-time data and analytics through the Coppertree user-friendly cloud portal, providing valuable insights for informed decision-making including knowing when deliveries are required and performance issues on site

## Customizable Alerts

Set customized alerts both on screen and remotely to receive notifications about important events and anomalies allowing you to take proactive measures and optimize operations.

**Experience the next generation of wet stock monitoring with CTRL-Kora. Contact us now to learn more.**
