CTRL-Wash
Payment Solution for Carwashes

Tomorrow's solutions today

CTRL-Wash Payment Solution

Simplify payment at your car with Clarksons CTRL-Wash module which allows payment at the carwash 24/7.

Our innovative device revolutionizes how you manage your carwash payments, while integrated monitoring helps keeps your carwash running and producing income.

Device Features

Versatile Payment for all carwash types

CTRL-Wash connects to a range of automatic and manual carwashes including Karcher, PDQ (LaserWash) and ISTOBAL as well as other compatible brands.

Invento Outdoor Payment terminals

The CTRL-Wash solution uses Invento (by Gilbarco) FlexPay OPTs.

These provide a high-quality secure payment solution with 5in/9in or 15in screens and no per transaction fees.

Supports all standard card types, contactless payments, mobile and POS interfaces as well as loyalty schemes, fleet cards, barcodes and pre-paid washes.

The screens (including advertising elements) are fully configurable via cloud connection.

Connectivity

CTRL-Wash connects to a range of carwashes via serial, ethernet and Modbus.

We can connect to the site network or supply a standalone 4G connection to enable payment and monitoring

Data on carwash performance can be transmitted to Clarksons secure Coppertree cloud dashboard including key metrics such as estimated number of days of product supply and when service is required

Payment and monitoring

Payment

By using the Invento FlexPay terminals integrated with carwash of your choice, you gain the following:

- Fully customizable screens with dynamic content including advertising
- Continuously keep secure and up to date with PCI 6 compliant EPS
- EMV & contactless cards compliant
- Open Loyalty API, ability to take customisable fleet/prepaid cards
- Integrated printer & bar-code scanner, PIX6 water resistance

Monitoring

Access real-time data and analytics through the Coppertree, a user-friendly cloud portal

**Experience the next generation of car wash payment with CTRL-Wash.
